# Pop Songs and Political Science

Steven V. Miller

Department of Political Science

## Sheena Easton and Game Theory

#### Sheena Easton describes the following scenario for her baby:

- 1. Takes the morning train
- 2. Works from nine 'til five
- 3. Takes another train home again
- 4. Finds Sheena Easton waiting for him

# A Total Conflict Game Between Sheena Easton and Her Baby

	Stays Home	Goes to Work
Baby Home Again	-100, <b>100</b>	<b>100</b> , 0
Baby Stays at Work	<b>50</b> , 0	-100, <b>100</b>

Sheena Easton and her baby are playing a zero-sum (total conflict) game.

- Akin to Holmes-Moriarty game (see: von Neumann and Morgenstern)
- Solution: mixed strategy

## Rick Astley's Re-election Platform

#### Rick Astley's campaign promises:

- ► Never gonna give you up.
- Never gonna let you down.
- Never gonna run around and desert you.
- Never gonna make you cry.
- Never gonna say goodbye.
- Never gonna tell a lie and hurt you.

Are these promises (if credible) sufficient to secure re-election?

### Rick Astley and Median Voter Theorem

Whereas these pledges conform to the preferences of the **median voter**, we expect Congressman Astley to secure re-election.

# Caribbean Queen and Operation Urgent Fury

Billy Ocean released "Caribbean Queen" in 1984.

- Emphasized sharing the same dream
- Hearts beating as one

"Caribbean Queen" is about the poor execution of Operation Urgent Fury.

► Echoed JCS chairman David Jones' frustrations with military establishment.

Billy Ocean is advocating for what became the Goldwater-Nichols Act.

Wanted to take advantage of economies of scale, resolve coordination problems in U.S. military.

## The Good Day Hypothesis

We know the following about Ice Cube's day.

- 1. The Lakers beat the Supersonics.
- 2. No helicopter looked for a murder.
- 3. Consumed Fatburger at 2 a.m.
- Goodyear blimp: "Ice Cube's a pimp."

## The Good Day Hypothesis

This leads to two different hypotheses:

- $\blacktriangleright$   $H_0$ : Ice Cube's day is statistically indistinguishable from a typical day.
- $\blacktriangleright$   $H_1$ : Ice Cube is having a good (i.e. greater than average) day.

These hypotheses are tested using archival data of Ice Cube's life.
